

Internship / Master's Project

@ Max Planck Institute / Cologne

Looking for a hands-on experience in a modern lab working at the interface of plant genetics and crop evolutionary biology?

We are offering an internship or a master's project on the genetics and history of barley domestication.

You will learn:

- **plant phenotyping techniques;**
- **statistical analysis of quantitative traits;**
- **graphics in programming language R;**
- **analysis of large genomic datasets**

no previous experience in programming required

You will be employed on a student helper contract for the duration of the project (10-17 hours/week).

Informal inquiries and applications:
pankin@mpipz.mpg.de; (0)221-5062-280.

Lab address:

**Artem Pankin / Maria von Korff
Max Planck Institute for Plant Breeding Research
Carl-von-Linne-Weg 10, 50829, Cologne**
