

Conduct your own research in collaboration with our international team in the Frommer lab in Düsseldorf

The [Frommer lab](#) has openings for **Humboldt Research Fellows** at the postdoc level through a **fast track** program since Wolf B Frommer has been selected as a Henriette Herz Scout.

Topic areas: Transport processes, biosensors, regulation of carbon allocation, electrical signaling, pathogen resistance, and more, check out [our website](#).

The [fellowship](#) come with many benefits.

- Fellowship is €2,670 (postdocs) and €3,170 for experienced researchers plus bench fees
- Additional support for families
- Lifelong support as Humboldt Alumni with option for return fellowships
- HHU also offer various types of support through [JUNO](#) to help you with the move

Key Requirements are:

- Doctorate completed within the last 12 years
- Outstanding scientific record and potential (Above-average publication record, commensurate with career level)

Additional requirements:

- Have not undertaken post-doctoral research stays nor completed degrees/doctorates in Germany
- Not hold German nationality
- Language skills: good knowledge of German or English, depending on research proposal
- Availability: the research fellowship should commence within 12 months of being granted
- No previous applications submitted to the Foundation by the candidate; no previous sponsorship in any of the Foundation's fellowship programs

The Humboldt Foundation encourages especially applications from women.
